

The FRCOG is working with Rep. Natalie Blais to better understand the work and funding that goes into the maintenance and repair of the dirt/gravel roads in our communities – especially in the context of more frequent, intense storms like this summer that damage these more vulnerable roads. To help with this effort, the FRCOG is asking you to fill out this survey:

<https://www.surveymonkey.com/r/DirtRoads>. The information you provide will help us advocate for increased funding and technical assistance to our towns.

In addition to the survey, we have also created an interactive online map in which you can add points to show the location of known issue spots on your unpaved roads. The map can be found here:

<https://frcog.maps.arcgis.com/apps/CrowdsourceReporter/index.html?appid=c0a515adb7134873a5b8f50f01bab7b1>. Feel free to mark on the map any locations that have reoccurring maintenance issues or that are in need of repair. You are also able to upload pictures, which will not only be informative, but will help Rep. Blais make her case in Boston about the needed funding for Western Mass unpaved roads. We will be sharing this map with the general public as well for increased outreach and data collection.
